Life insurance that's available while you are still living

Accelerated Benefit Riders

QoL Flex Term has built-in Quality of Life Accelerated Benefit Riders that can provide an advance of your policy's death benefit to help cover the costs of care, recoup lost income or any other purpose should you have a qualifying chronic, critical, and terminal illness or condition.

They also offer an accelerated lifetime maximum benefit up to \$2,000,000.

These benefits can help make an impact on your lifelong security and peace of mind.

One size doesn't always fit all – neither should your life insurance.

QoL Flex Term is based on a simple idea: your policy is tailored for the amount of benefit you need, for the length of time you need it. Other insurance companies sell policies that last for 10, 15, 20 or 30 years. QoL Flex Term offers insurance for 10 years, any annual duration from 15-30 years, or 35 years.

Buy only what you need QoL Flex Term is flexible enough to match your situation, and is economical because you don't pay for insurance you don't need.

Convertibility Full convertibility to a permanent life insurance policy up to the end of the level- premium period (or attainment of age 70 of the insured, whichever comes first). This conversion option is available without evidence of insurability or additional underwriting. Ask your financial professional for details.

QoL Flex Term offers a valuable new way to customize your life insurance plans to help while you are still living, and help your loved ones after you're gone.

Coverage beyond working years

Retired workers who no longer have access to group life insurance may be in need of a policy that fits their new stage of life. With QoL Flex Term, these individuals can get the customized coverage they need for protection or final expenses.

Protection until retirement

Loss of income in a single income household, whether by death or by significant illness, can have effects that are felt quickly. QoL Flex Term offers the flexibility to purchase a policy that helps to meet both needs – without paying for insurance when it's no longer needed.

Solutions for single parents

Single parents are often concerned about their children being able to afford college tuition in the event of their premature death. QoL Flex Term can be customized with a 10-year term period and incremental term periods between 15 and 30 years as well as a 35 year period.

Help protect your home

Homeowners can help protect their home and loved ones in the event of an unexpected death with QoL Flex Term. Customizable durations and guaranteed death benefits can match coverage to the remaining years on your home mortgage. The built-in accelerated benefits can also help to protect your home mortgage by helping to ensure you have enough money to pay your mortgage payments in the event of a chronic, critical or terminal illness.

Options for business owners

Business owners who can't afford to reward workers with large bonuses can consider using life insurance as an incentive to valuable employees. QoL Flex Term's customizable policies and built-in accelerated benefits can help provide a valuable incentive for workers approaching retirement.

Some of the most life-altering disruptions to a person's quality of life are major health events. Between the cost of care and the potential lost income, chronic, critical, and terminal illnesses can have a significant financial impact on quality of life at any stage.

Quality of Life...Insurance includes built-in benefits to help you maintain your quality of life during such events. The Accelerated Benefit Riders can provide an advance of your policy's death benefit to cover the costs of care, recoup lost income or any other purpose.

Chronic Illness Accelerated Benefit

Chronic illnesses are typically conditions suffered for a long period of time, during which normal daily living is disrupted. The qualifying illness or conditions affect the ability to perform simple tasks like eating or dressing without assistance; or, they may also involve severe cognitive impairment that necessitates substantial supervision, such as Alzheimer's disease.

The illness or condition does not need to be considered permanent, but must impair the insured where he or she is unable to perform at least two Activities of Daily Living (ADLs);

- Bathing
- Dressing
- Toileting
- Transferring
- Contenance
- Eating

Critical Illness Accelerated Benefit

Critical illnesses often come suddenly and without warning, and the financial affect can be life-altering. Quality of Life Insurance can help you reduce the financial effects of the following qualifying critical illnesses or conditions¹:

- Heart Attack
- Stroke
- Major Organ Transplant
- End Stage Renal Failure
- Amyotrophic Lateral Sclerosis (ALS)
- Paralysis
- Invasive Cancer

¹ Benefit eligibility is subject to limitations and/or Waiting Period, Elimination Period and exclusion requirements. Please read the rider carefully for a complete definition of benefits and the conditions.

² Life expectancy criteria vary by state.

Disclosures Applicable to the Chronic Illness Accelerated Death Benefit Rider Only

For a claimant to be able to elect an Accelerated Benefit under the Chronic Illness Accelerated Death Benefit Rider, such claimant must have been certified as Chronically Ill within the past twelve (12) months by a Licensed Health Care Practitioner. Where an Accelerated Benefit under such a rider is paid periodically, such a rider is paid periodically; such written certification must be renewed by a Licensed Health Care Practitioner every 12 months.

NOT Long-Term Care Insurance

This is a life insurance benefit that also gives you the option to accelerate some or all of the death benefit in the event that you meet the criteria for a qualifying event described in the policy. This policy or certificate does not provide long-term care insurance subject to California long-term care insurance law. This policy or certificate is not a California Partnership for Long-Term Care program policy. This policy or certificate is not a Medicare supplement policy.

An accelerated death benefit such as the Chronic Illness Accelerated Benefit Rider and long-term care insurance provide very different kinds of benefits:

Generally, an accelerated death benefit is a rider to or other provision in a life insurance policy that permits the policy owner to accelerate some or potentially all of the death benefit of a life insurance policy if the insured meets the definition of having a chronic illness as defined in the rider or policy provision. Acceleration of death benefits and payments under such an accelerated death benefit will reduce the death benefit of the policy and reduce other policy values as well, potentially to zero. If the entirety of the insurance amount is accelerated, the policy terminates.

A Long Term Care insurance policy is any insurance policy, certificate, or rider providing coverage for diagnostic, preventive, therapeutic, rehabilitative, maintenance, or personal care services that are provided in a setting other than an acute care unit of a hospital. Long-term care insurance includes all products containing any of the following benefit types: coverage for institutional care including care in a nursing home, convalescent facility, extended care facility, custodial care facility, skilled nursing facility, or personal care home; home care coverage including home health care, personal care, homemaker services, hospice, or respite care; or community-based coverage including adult day care, hospice, or respite care. Long-term care insurance includes disability based long-term care policies but does not include insurance designed primarily to provide Medicare supplement or major medical expense coverage.

If you are interested in long-term care, nursing home or home care insurance, you should consult with an insurance agent licensed to sell that insurance, inquire with the insurance company offering the accelerated death benefits, or visit the California Department of Insurance Internet Web site (www.insurance.ca.gov) section regarding long-term care insurance.

If you choose to accelerate a portion of your death benefit, doing so will reduce the amount that your beneficiary will receive upon your death.

Receipt of accelerated death benefits may affect eligibility for public assistance programs, such as Medi-Cal or Medicaid. Prior to electing to receive the accelerated death benefit, you should consult with the appropriate social services agency concerning how receipt of accelerated death benefits may affect that eligibility.

If the policy terminates, the Chronic Illness Accelerated Death Benefit Rider will also terminate.

LTC expense reimbursement vs. ADB benefits are paid without receipts. LTC benefits are based on benefit levels and a pool of money selected at the time of purchase, and ADB benefits depend on the life policy value. ADB benefits will reduce the death benefit that the policyholder's heirs will receive, and the use of the ADB proceeds is unrestricted, whereas LTC benefits will not reduce the death benefit that the policyholder's heirs will receive and the policyholder must use LTC benefits for LTC services.

Enjoy life knowing you've planned and are prepared!
